

Workday Student

With higher education in the midst of a step change, institutions in Australia and New Zealand must juggle competing priorities, such as rising student expectations with tight funding constraints. As students now have greater choices and regulatory changes make it more difficult for foreign students in Australia, higher education institutions can't afford outdated, rigid technology.

Purpose-built for higher education institutions, with higher education institutions.

Put student success at the heart of everything you do with the support of Workday Student. Whether they're on campus, learning remotely, or balancing study with work and life you can provide students with a seamless, mobile-first experience.

Workday Student is the only student administration application built in this century. To ensure we understand and serve the needs of both students and administrators, Workday has partnered with leading higher education institutions. Together, we've developed an end-to-end student management platform that helps to modernise institutions and transform student experiences.

Integrating seamlessly with Workday Financial Management, Workday Human Capital Management (HCM), and Workday Adaptive Planning, Workday Student unites your campus under a single, configurable, easy-to-use application delivered in the cloud.

Delivering on your vision for student success.

Workday Student delivers flexibility, insights, and a simplified student experience. It's designed to enable you to meet changing needs through a foundation that evolves with you.

We understand that active student engagement is paramount throughout a student's journey. Our product suite offers built-in native engagement tools, enabling you to actively engage students at every stage of their journey with you.

Join the growing number of Australian and New Zealand universities who trust us to help them stay agile, competitive, and ready for the future. Let's work together to create a seamless, future-ready experience across HR, finance, and student systems for your entire campus community.

Key Benefits

- Gain new insights with a single source of truth across finance, HCM and student admin
- Engage students throughout their journey
- Provide mobile-first experiences
- Enable students to plan courses and understand academic eligibility and progress
- Empower students, faculty, and staff through self-service and a user-friendly interface
- Reduce costs with true cloud delivery model

Key features

- Single user experience throughout the student lifecycle
- Delivered end-user reports and dashboards
- Self-service and mobile app capabilities puts tasks and information straight into the hands of users
- Seamless academic planning to saved schedule to registration experience
- Flexible foundation for agility to change requirements on the fly

Empower students with seamless engagement.

Deliver outstanding student experiences by removing barriers and providing the modern experience they expect. When you offer an easy-to-navigate, personalised experience, you enhance both individual engagement and campus communities. You can keep your students connected and supported at every stage with built-in engagement tools that send timely notifications, share important updates, and guide them through key tasks:

- Remove barriers to achievement with mobile-first self-service, so students can manage their studies anytime, anywhere.
- Automatically send alerts and reminders about deadlines, appointments, and academic progress, so nothing gets missed.
- Make it easy for students to schedule appointments, request course changes, and complete important actions—all in one place.
- Guide them to the skills they need for today's workforce, using AI-powered recommendations and up-to-date career insights.
- Build curated content and guided paths with Workday Journeys for Students. Journeys can include steps and suggestions such as tasks, action items, knowledge-base articles, and videos.

Meet the needs of faculty and staff.

We partner with you to deliver a platform that's built for the future of higher education in Australia and New Zealand. With Workday Student, you're equipped to respond to change, support your students, and achieve academic and administrative excellence—all while enjoying a seamless, intuitive experience that makes work more rewarding and effective.

- Empower your staff with real-time insights, making it simple to spot trends, understand student needs, and support them early.
- Streamline administration with automated workflows and robust data security, freeing your people to focus on teaching, research, and student support.
- Bring together finance, HR, and student data in one place, so student advisors and staff have the right information at their fingertips.

Drive better outcomes across your institution.

Build digital agility and stay globally competitive. Workday Student empowers your teams to make smarter decisions, adapt quickly, and deliver outstanding experiences for students and staff.

- Streamline your operations with a flexible, cloud-based system architecture that can be easily adapted to your workflows—no more costly customisations. Configure options for curriculum, calendaring, academic policies, grading schemes, billing, etc.
- Unify your student, finance, and people data for real-time insights—so you can plan confidently, respond to change, and meet strategic goals.
- Access powerful insights drawn from a real-time single source of truth. For example, when Workday Student is combined with Workday Financial Management, you gain instant transparency of revenue by program of study.
- Put the power of reporting into the hands of end users to support strategic planning. For example, you can track actual course demand in current and future semesters, enabling your registrar and provost to better allocate course resources.
