

# Sync your employee records *accurately,* *simply,* and *securely*

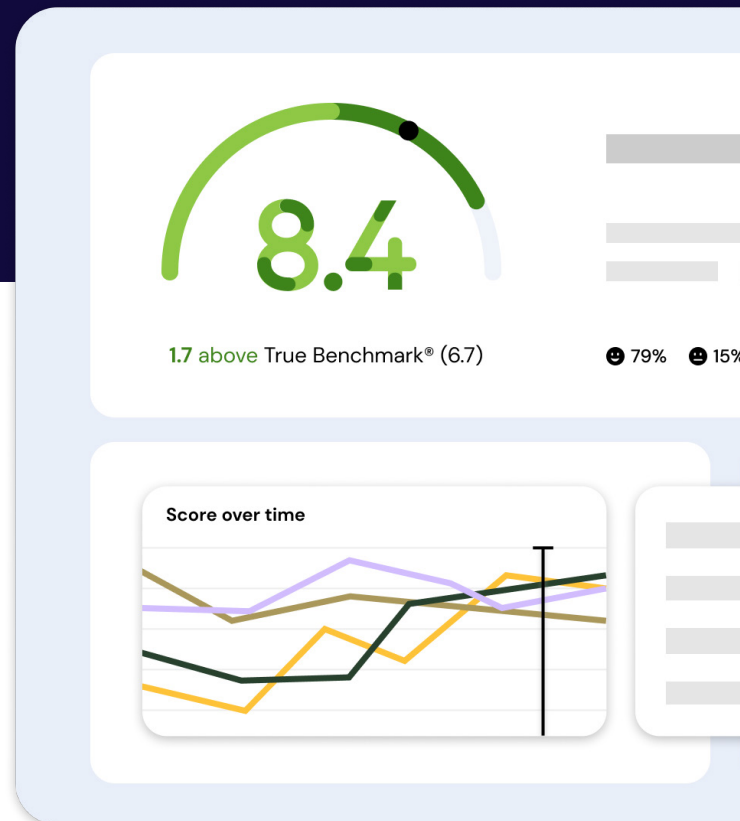

Set up your employee records in Peakon, start collecting feedback in your organization, and make sure you're always working with the most accurate insights.

Work should work for people. It is this philosophy that united our co-founders in late 2014 to form their own company based out of Copenhagen in Denmark – because we believe that people are an organization's most valuable asset.

Peakon, a Workday company, is an employee engagement platform that converts feedback into meaningful insights, driving execution excellence, transformational success while helping every employee drive the change they want to see.

Thanks to its Intelligent Listening technology, Peakon delivers real-time insights about employee engagement, diversity, equity & inclusion, and growth, in an all-in-one employee success platform.

To help you build an accurate view of your employee experience, we offer a wealth of time-saving integration options that best suit your organization, no matter how your HR data is structured.

# Seamless *integration* with your HRM software or *create your own*

## Quick and easy out-of-the-box integrations

Simple integration across employee directories compatible with SCIM 2.0 protocol such as Personio, Bamboo HR, HiBob, Okta, Sapling, Microsoft Azure, Workday, and many more.

## Unlimited capabilities with your own custom integration

Integrate your own employee directory or Human Resource Management System with Peakon, using our open SCIM 2.0 API.

Existing Workday customers can seamlessly integrate with Peakon's employee engagement platform. For non-Workday customers, Peakon offers a number of out-of-the-box SCIM 2.0 integrations, as well as an enterprise-grade REST API connectivity seamlessly integrating with all enterprise-class HRIS systems in a simple, and secure way. Once the integration is set-up, Peakon will automatically update as your HRIS data is updated.
