For Hana, a Workday administrator, a configuration question used to cost an afternoon of research. Now Admin Agent answers it in the flow of work — tenant-specific, without leaving the system. And when a release lands, Hana sees its impact mapped against her actual configuration before it goes live. **IT shifts from reactive maintenance to strategic partner.**

Less system upkeep.
More strategic impact.

Just ask inside your tenant, and **Admin Agent** analyzes, optimizes, and guides — no context switching.
