

Meet Payroll Agent.

For Carla, a pay run that looked off used to mean days of tracing the root cause. Now Payroll Agent surfaces the issue, explains the cause in under a minute, and proposes a fix, looping Carla in for approval. **A half-day search, or a consultant bill, avoided with one ask.**

Less manual work, more control. That’s how we payroll.

Just ask, and **Payroll Agent** validates, explains, and recommends the next action — with human oversight at every step.

- Automate Pay Workflows
- Surface Payroll Insights
- Detect Config Gaps
- Flag Wage Changes
- Answer Payroll Questions
- ...and more

Shift from cleaning up errors to preventing them:
more accurate pay cycles, worker trust protected.
