STAFFING GAPS

\$18,400

Projected sales volume

REVENUE OPPORTUNITY

Without action

Understaffed shifts will lead to longer wait times, missed sales during peak hours, and increased pressure on your current team.

Shift Cost Breakdown — 7 Shifts

Revenue Opportunity	\$18,400
Labor Cost	\$2,600
Predictive Scheduling Penalty	\$1,050
Total Cost	\$3,650
Net Revenue Gain	\$14,750

Weekly Impact

Sales to Labor Ratio	6.8x ↑
Budget Variance	+\$3,650
Projected Weekly Revenue	\$122,800

For Rosa, a store manager planning her next schedule, Workforce Management Agent predicts and forecasts labor spikes, finds compliant worker replacements to fill shifts in seconds, lets workers instantly upload project hours, and automates heavy lifting while pulling managers in for sign-off. **Shifts stay covered, time entry is effortless, and labor costs stay in check.**

Instant frontline coverage. Zero manual time entry.

Just ask Sana across web, mobile, Slack, or Teams, and **Workforce Management Agent** runs the process and loops you in when it counts.

Manage Timesheets

Cut Time-Entry Errors

Orchestrate Shift Swaps

Monitor Demand & Recommend Replacements

...and more

Keep managers on the floor and workers on the go — coverage handled and costs controlled.
