Workday Payroll for the UK addresses the full spectrum of enterprise payroll needs. It offers the control, flexibility, and insight you need to support the unique aspects of your organisation.

Get the most out of your investment in Workday Human Capital Management

Designed as part of a single system alongside Workday Human Capital Management (HCM), Workday Payroll helps you maximise your overall investment.

- Take advantage of the Workday core system-of-record for worker data across HCM and payroll to manage changes for benefits, terminations, and life events.

- Benefit from a single self-service application. Employees can request time off, check online pay slips, and make payment elections from the same application on a browser or a mobile device.

Flexibility to address unique requirements

Traditional payroll applications provide hard-coded, out-of-the-box packages that are often unable to accommodate specific business needs. The flexible and intuitive configuration of Workday supports your organisation’s advanced requirements.

- **Robust calculation engine:** Run payroll calculations as often as you want with a powerful payroll-calculation engine that’s built to handle the most complex payroll requirements. Drastically reduce payroll processing time from hours to minutes.

- **Highly configurable:** Configure accumulations, balance periods, and balances according to your current calculation and reporting needs. Place workers into logical pay groups according to the needs of the organisation.

- **Role-based and segment-based security:** Access pay results with configurable role-based permissions. Configurable security improves collaboration, giving business partners outside of the payroll department the ability to provide input and view results before payroll completion.
